

I think it would be a travesty to allow the National Association of Broadcasters to dictate what I am permitted to hear on my car or home stereo system. Their actions in attempting to limit the material that can be broadcast by satellite radio companies is an obvious attempt to eliminate competition for the mediocre services provided by terrestrial radio, and is an infringement of my rights as a citizen of the United States and as a paying customer of a satellite radio company. I strongly and respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's and Sirius' ability to provide the kind of programming that we demand and deserve. Thank you.
